

Staying ahead of a fast-shifting marketplace

Empower your architecture teams to **transform with agility**

Did you know?

97%

of organizations are working to realign their IT operating model with an evolved business strategy that addresses changes in the market.¹ But...

86%

are faced with widening skills gaps and can't find talent with the right skillsets²

Are you ready for what's next?

Expertise powered by analytics, insights, and automation to enhance agility and drive results

From navigating architecture concepts and assessing strategy to developing and supporting a transformation roadmap, Cisco® can help your business perform better and innovate faster to see outcomes, like:

more successful transformations³

faster adoption³

more efficient deployment³

How can you see results like these?

With Cisco Business Critical Services Essentials, Advantage, and Premier lifecycle tiers, architecture teams can align their IT strategy with changing business priorities to drive unprecedented agility.

Tiers include, among other services:

Expert Review Workshops – Strategy

Translate your business goals and technology requirements into an architecture strategy, vision, and roadmap.

Expert Review Workshops – Architecture

Gain guidance on architecture structures, best practices, and recommendations to help drive IT change and transformation.

Ask the Experts

Address technology hurdles to eliminate barriers and grow expertise with Cisco-led webinar coaching sessions.

Accelerators

Tackle specific architecture challenges along the adoption lifecycle, with one-to-one remote technical sessions with a Cisco expert.

Plus, with our **Specialized Expertise** offerings, architecture teams can gain consultative planning support and a dedicated Cisco solution architect to create an adaptive workforce and fill skillset gaps.

Leveraging Cisco's 35+ years as an industry leader, **Business Critical Services** gives your architecture team the expertise needed to enable agility and accelerate adoption and transformation across your IT environment.
