

# Staying ahead of the competition

Unlock your DevOps team's **full potential**

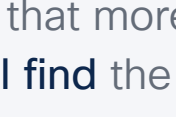

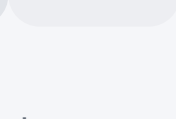

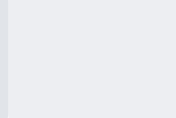

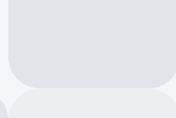

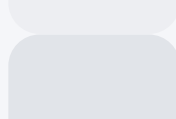

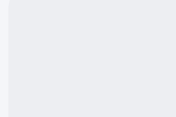

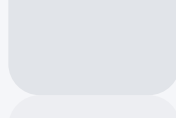

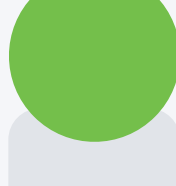

## Did you know?

Spending for digital transformation is on the rise as orgs evolve their workflows, services, and business models to be ready for what's next.<sup>1</sup>

By 2023, **40% of product and platform teams will employ automation** in DevOps pipelines, reducing unplanned downtime by 20%.<sup>2</sup>

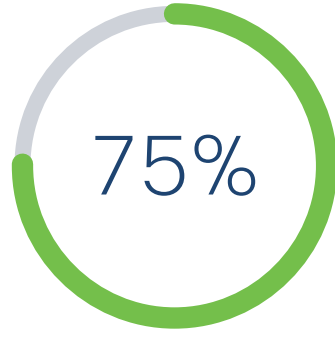

And research shows that more than **50% of orgs still find the DevOps transformation journey to be difficult.**<sup>2</sup>

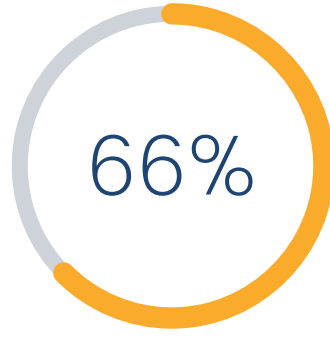

## Expertise powered by analytics and insights for proven results

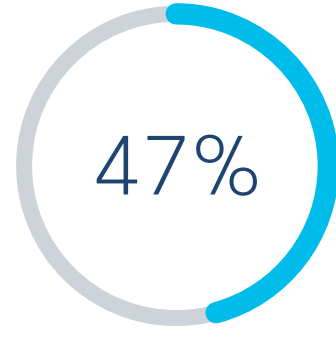

A leader in DevOps, Cisco® Business Critical Services can help teams ease the path to transformation and innovation to achieve results, like:

faster solution validation<sup>3</sup>

faster time to market<sup>3</sup>

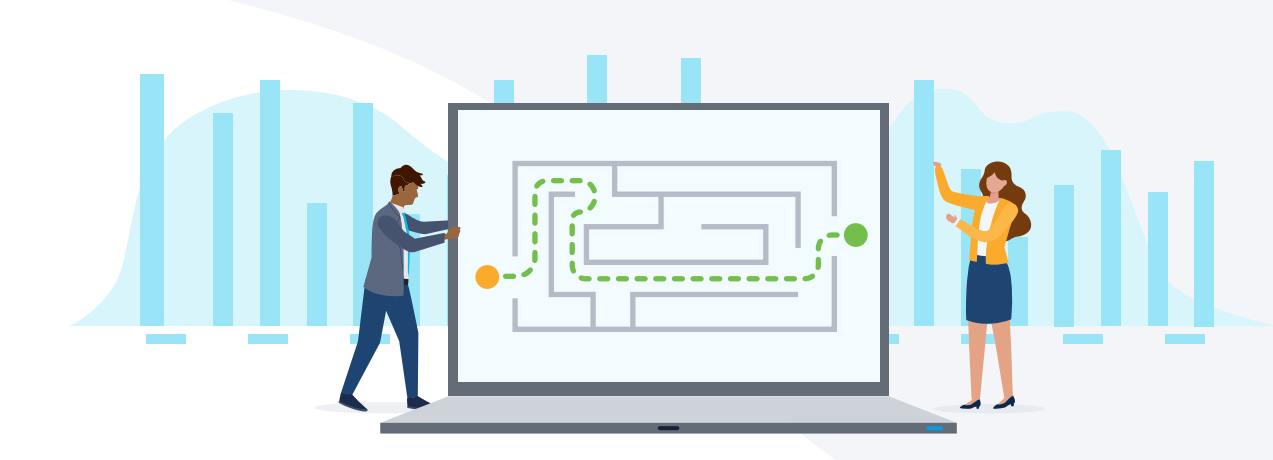

reduced test execution time<sup>3</sup>

## Speed development and drive transformation

With Cisco Business Critical Services, DevOps teams gain access to expertise, analytics, and insights to accelerate software development, deployment, integration, and management, and align technology with evolving business priorities.

**Packages include, among other services:**

### Expert Review Workshops – Strategy

Get counsel on how to continuously transform the application delivery process to align application development with strategic business planning.

### Expert Review Workshops – Design

Evaluates business, operational, and functional processes to assess your readiness for continuous deployment and automation within your environment.

### Expert Review Workshops – Test Plans

Address and resolve risk by ensuring your network aligns with Cisco best practices and industry standards and identifying potential risk around automated software deployment, pipeline design, and implementation.

### Accelerators

Tackle specific technology challenges along the adoption lifecycle, with one-on-one remote technical sessions from a Cisco expert.

And DevOps teams can create an adaptive workforce and fill skillset gaps with our **Specialized Expertise** offering, including Scrum Services and Expert-as-a-Service.

Leveraging Cisco's 35+ years as an industry leader, **Business Critical Services** delivers the expert guidance your DevOps team needs to accelerate time to market—so you can drive agility, innovation, and growth.
