

Expert cybersecurity, managed for you.

Do you have the resources to defend?

"

One in four organizations risks a major breach in the next 24 months¹

"

Every 14 seconds a business falls prey to a ransomware attack²

\$7.91 million is the average cost of a data breach in the U.S.³

Industry average threat detection time is 206 days¹

Industry average time to contain a threat is **73 days**¹

Containing a threat in less than **30 days** saves on average \$1 million dollars¹

Reducing the time to detect and contain a breach is not an easy task for organizations – 3.5 million jobs will go unfilled by 2021⁴

You need the right talent and expertise to address cybersecurity. Let Cisco® Managed Detection and Response (MDR) put the best in cybersecurity on guard for you around the clock.

MDR helps you improve your organization's security posture and advance security operations efficiency with an expert team and unmatched threat research.

MDR delivers industry-leading 24x7x365 threat detection and response by combining:

- An elite team of Cisco
 researchers, investigators,
 and responders
- Integrated threat intelligenceand automation
- Defined investigations and response playbooks supported by Cisco Talos® threat research
- Relevant and effective actions
 to respond to threats faster

Advance your security operations capabilities while reducing mean time to detect and contain threats faster with Cisco Managed Detection and Response.
