Expert cybersecurity, managed for you.

Do you have the resources to defend?

One in four organizations risks a major breach in the next 24 months[1]

Every 14 seconds a business falls prey to a ransomware attack[2]

$7.91 million is the average cost of a data breach in the U.S.[3]

Industry average threat detection time is **206 days**[1]

Industry average time to contain a threat is **73 days**[1]

Containing a threat in less than **30 days** saves on average **$1 million dollars**[1]

Reducing the time to detect and contain a breach is not an easy task for organizations - **3.5 million jobs will go unfilled by 2021**[4]

You need the right talent and expertise to address cybersecurity. Let **Cisco® Managed Detection and Response (MDR)** put the best in cybersecurity on guard for you around the clock.

MDR helps you improve your organization's security posture and advance security operations efficiency with an expert team and unmatched threat research.

MDR delivers industry-leading **24x7x365 threat detection and response** by combining:

- An **elite team** of Cisco researchers, investigators, and responders
- Integrated **threat intelligence** and **automation**
- Defined **investigations** and **response playbooks** supported by *Cisco Talos® threat research*
- Relevant and effective **actions** to respond to threats faster

Advance your security operations capabilities while reducing mean time to detect and contain threats faster with **Cisco Managed Detection and Response.**
