

Flexible Solutions for K-12 Hybrid Learning

Schools today have been forced to adapt to new learning models, such as the hybrid model to maintain learning continuity in this ever-changing environment. More than ever, technology is called upon to provide equitable, effective, and efficient learning, and Cisco Meraki networking and security solutions are ready to help.

Securely run the network from anywhere

While many learning resources are now hosted in the cloud, there's always a few essential services back in the classroom - that students or staff may need secure access to. [Meraki MX](#) provides the perfect termination point for remote connections, with no special software for up to 10,000 connections.

Meraki Security & SD-WAN Appliances

- Supports 1,000s of VPN connections
- Industry-leading Cisco Security features
- Simple site-to-site networking across school districts

MX100

Monitor physical distancing

Technology can help safely bring students back into the classroom. [Meraki Smart Cameras](#) and [Wi-Fi Access Points](#) can help staff and faculty maintain safe physical distancing by providing access to video from any device. Simple device location techniques show where students are congregating and where pinch points may be.

Meraki Smart Cameras

- Fast to deploy
- Monitor from anywhere via desktop or mobile
- No separate video recorder

Meraki Access Points

- High-capacity indoor and outdoor Wi-Fi 6
- Onboard device location analytics
- Built-in Bluetooth for asset and beacon tracking

Keep students focused

Managing screen-based distractions is a big challenge with remote learning. [Meraki Systems Manager](#) enables teachers to lock managed iOS and Android devices to specific applications during lesson time, encouraging students to stay focused on learning, and apps can also be easily added/removed as required.

Meraki Systems Manager

- Keep track of 1,000s of managed devices
- Manage applications
- Enforce single-app mode in lesson time

Stay connected

Access to the technology and connectivity required for remote learning is a paramount concern for many schools, according to a recent study by the Center for Digital Education. Meraki can help with dependable [outdoor Wi-Fi](#) and a [Cellular Gateway](#) that can be deployed in a matter of minutes, then managed from anywhere.

Meraki Cellular Gateway

- Provide turnkey connectivity at remote locations and parking lots
- Ruggedized to withstand all four seasons
- Connect Access Points for Wi-Fi
