

More personal,  
productive,  
and profitable:  
Your contact  
center

Work smarter with  
**Webex Contact Center**

Customers today expect fast, friendly, and personalized service, and they expect it whether they're talking to a retail clerk, a bank teller, or a contact center representative. Customers have a wealth of choices at their disposal and will be quick to pass the word on when they have a good or bad experience.

Delivering on these high expectations, particularly with older contact center solutions, isn't easy. But with technologies like cloud, artificial intelligence (AI), machine learning (ML), and data analytics, your contact center can go beyond meeting expectations to becoming a center for growth.

**Chapter 1:** Today's contact center challenges

**Chapter 2:** From cost center to profit center

**Chapter 3:** The Webex Contact Center difference

**Chapter 4:** Reaching experts quickly

**Chapter 5:** The cognitive contact center

**Chapter 6:** Integrated and cost-effective

**Chapter 7:** Why Cisco for contact center

# 1 Today's contact center challenges

Ultimately, the goal of a contact center isn't just about solving customer problems quickly. It is to contribute to the overall success of an organization by increasing revenue and helping gain new customers. Yet contact centers today face a number of challenges that are standing in their way.

## **Connecting the customer to the right expertise**

Agents need quick and easy access to context, customer data, and experts in your organizations. You need to find a way to give them this without overloading or distracting them.

## **Seamless multichannel experience**

Customers want to engage easily with you on the channels of their choice. But when channels are siloed, it hinders your agents' productivity and delivers an inconsistent and fragmented experience for your customers.

## **Accessing innovation**

Contact centers have traditionally struggled to adopt modern technology. While the cloud has led to rapid innovation in many areas of organizations, contact centers have been left behind.

46% of all consumers will abandon a brand if the employees are not knowledgeable.<sup>1</sup>

### **Agent productivity**

Keeping agents productive requires efficient processes and intuitive desktop tools. And the more you can automate routine tasks and connect them to the people and content they need, the more successful they will be at serving your customers.

### **Agent turnover**

Contact center agents are valuable resources. Keeping them happy and productive is the number-one challenge of contact center managers. Agents need tools that help them manage information overload. That means there is less agent turnover, so you can minimize recruiting and training, which is expensive and time consuming.

### **IT productivity**

IT staff needs to be able to manage your contact center efficiently and cost-effectively while meeting the strategic needs of the business. You need a solution that minimizes cost and complexity, one with an open architecture to ensure that your contact center connects to your in-place systems and investments, and lastly, one that is scalable to improve IT resource productivity.

## Benefits of a cloud contact center

- Improved agility
- Innovative features for cloud
- Reduced costs
- Faster deployment of services
- More efficient IT
- Higher security

## 2 From cost center to profit center

In reality, the challenges facing today's contact center disguise an exciting opportunity. Solve them, and you won't just exceed customer expectations, you will also power business growth.

**A cloud-based software-as-a-service contact center is the best way to achieve these goals:**

- Start using and benefiting from new features as soon as they're available.
- More easily implement new technologies like AI.
- More easily integrate with other cloud apps like Salesforce.

A move to the cloud doesn't have to be difficult, either. Cloud-based solutions can live alongside or supplement existing on-premises systems, adding functionality without requiring complicated migrations.

**Cloud innovation will ultimately result in:**

- Boosted agent productivity and minimized agent turnover
- Improved first-contact resolution
- Increased customer loyalty and lifetime value
- Boosted business operations and performance

### 3 The Webex Contact Center difference

It's time for a new contact center—one that uses technology to help every agent and every customer. Cisco Webex® Contact Center is a native cloud contact center solution that enables enriched customer engagement experiences between businesses and their customers.

- **Native cloud**  
Designed and built as a cloud solution for security, reliability, flexibility, and scalability
- **Omnichannel**  
All your customer interactions—voice, chat, and email—handled with universal queueing and routing in a unified environment
- **360-degree customer journey analytics**  
Tracks and analyzes the customer experience through the entire lifecycle across all channels
- **Predictive analytics–based routing**  
Predicts customer needs based on their stage of the customer journey and matches them with the best available agent for that need

73% of consumers point to customer experience as an important factor in their purchasing decisions.<sup>1</sup>

83% of consumers have to repeat the same information to multiple agents.<sup>2</sup>

- **Intelligent and contextual**  
Artificial intelligence woven into the agent and customer experience with Virtual Customer Assistant self-service and Cisco® Answers
- **Expert collaboration and communications**  
Built-in on-demand voice and chat collaboration with other agents, managers, and subject matter experts
- **Business application integrations**  
Uses the data from your business applications (e.g., CRM) to determine routing, in addition to screen pops
- **Workforce optimization**  
Dynamic scheduling with agent participation, quality management, and “voice-of-the-customer” insights through speech, text, and desktop analytics
- **Outbound campaigns**  
Preview, as well as progressive dialing and management

98% of companies experience improved customer retention rates when their contact center is enabled for unified communications (UC).<sup>3</sup>

25% of companies have a decrease in agent turnover rate with a UC-enabled contact center.<sup>3</sup>

## 4

## Reaching experts quickly

What tools help your agents quickly and easily connect with back-office experts and your customers?

### Built-in chat

This means your agents don't ever have to leave their desktop experience to send a message to a back-office expert or a customer. It's fast and intuitive with Cisco Webex Teams<sup>TM\*</sup>.

### Integrated calling

Your agents enjoy enterprise-class voice capabilities with built-in Webex Calling.

### All included

Best of all, you don't have to buy or connect to a separate phone system or collaboration tool. And Webex<sup>®</sup> Contact Center works seamlessly with Webex Teams<sup>TM\*</sup> and Webex Calling.

\* Webex Teams integration for collaboration with back-office experts available CY2020.

## 5 The cognitive contact center

The cognitive Webex Contact Center uses AI to empower your agents with the knowledge, data, and context they need to have fast, accurate, and more personalized conversations with customers.

Providing self-service virtual assistant options to your customers is the most effective way to give them faster service, minimize wait times, and improve customer satisfaction. If the bot detects that an agent is needed, it escalates the customer chat to an agent along with all the history of the interaction, making the transition from self-service to agent-assisted chat a breeze.

Likewise, Cisco Answers gives your agents real-time contextual help while they interact with customers. It listens to the phone and chat interaction and proactively displays relevant answers for your agents, removing the chaos of app switching and minimizing endless search time.

Now you have happier agents who can care for each customer at a highly tailored and individualized level.

# 32%

32% of people will walk away after one bad experience, even if they love your company or product.<sup>1</sup>

# 46%

46% of people will abandon a brand if employees are not knowledgeable.<sup>1</sup>

# 60%

60% of people will stop doing business with a brand if the service was not friendly.<sup>1</sup>

## 6 Integrated and cost-effective

Using integrated business applications in your contact center can improve customer and agent experiences. The Webex Contact Center has prebuilt connectors for deep integration with your most common CRM and other apps, including Salesforce, Microsoft Dynamics, and Zendesk. The result? Higher productivity, minimized siloes, and streamlined workflows.

**When you run your entire contact center from within Salesforce, Microsoft Dynamics, or Zendesk, you gain:**

- **Increased productivity with less complexity**  
100 percent native application integration for managers, administrators, and agents
- **Unified agent user experience**  
Native agent workflow, call handling, screen pop, call control, click-to-dial, automatic call logging, and omnichannel communications
- **Unified visibility, control, and reporting**  
Customer, call, and agent data gets integrated into the CRM application for a 360-degree view of customer experience and agent performance

## 7 Why Cisco for contact center

### Global cloud leader

Cisco is the market-share leader for contact centers: number one in North America and number two worldwide.

### Intelligent journeys

AI and ML practices help you provide contextual, suggestive, and predictive customer experiences.

### Flexible migration

Our “cloud first, not cloud only” approach makes it easy for you to take your first steps to cloud.

### Integrated portfolio

Our broad and tightly integrated portfolio provides deep expertise in all areas of communications, contact center, collaboration, calling, security, networking, and devices.

### Unified open platform

Our open platform architecture enhances business processes and workflow efficiency, as well as integrates with all the business tools that touch your contact center.

### Security and trust

Cisco has an unassailable reputation for true security, and we continue to invest billions of dollars to make your contact centers more secure.
