

CLAMPS

PIPE CLAMPS

Every H&M Easy-Fit Pipe Clamp provides quick precision fit-up of flanges, fittings and pipe-to-pipe alignment. The Easy-Fit Clamps are manufactured using double-walled steel plate and are lightweight for all overhead work. They feature a T-handle which slides back and forth for easy positioning in tight locations.

The clamps feature smooth roller-clamping action for a positive grip. They are equipped with fine-adjustment screws offering quick HI-LO fitup, spring-loaded stainless steel alignment screws at point of contact.

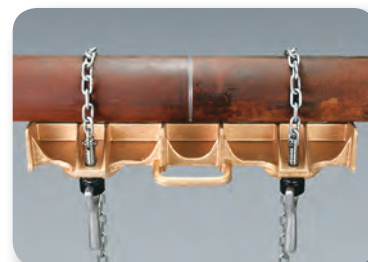

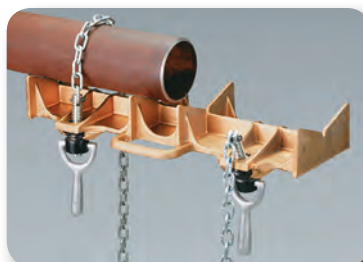

EASY-FIT PIPE CLAMPS

ITEM DESCRIPTION	PART NO.	PIPE SIZES (NOM.)		NET WEIGHT		SHIPPING WEIGHT		SHIPPING DIMENSIONS

ADJUSTABLE PIPE CLAMPS (APC'S)

H&M's Adjustable Pipe Clamps do the work of multiple cage-type clamps. The APC'S feature convenient carrying handles to ease transport to any job site. They feature machined V's for perfect pipe alignment every time. One person can position any of these clamps and start welding in about two minutes for most applications and pipe sizes. No extra tools or ratchet handles are needed. The Acme threaded bolts, nuts and chains are captive to all of these pipe clamps, eliminating any lost or misplaced parts.

ITEM DESCRIPTION	PART NO.	PIPE SIZES (NOM.)		NET WEIGHT		SHIPPING WEIGHT		SHIPPING DIMENSIONS	
		IN	MM	LB	KG	LB	KG	IN	MM
Cast Iron	APC-8	2 to 8	50 to 200	14	6.35	16	7.26	16 x 6 x 6	406 x 152 x 152
Aluminum	APC16-A	2 to 16	50 to 400	16	7.26	18	8.17	21 x 6 x 9	533 x 152 x 229

NOTE: All pipe clamps are ONLY designed for aligning pipe ends during the welding or tacking process. DO NOT use the clamp (s) to support any weight of pipe and/or fittings in any situation. DO NOT use the clamps with shims, wedges or cheaters.
